

**Supplementary material 4.** List of cyanobacteria registered in Pampean lakes classified according to their occurrence. t: present in turbid lakes; tt: frequent and abundant in turbid lakes; c: present in clear lakes; cc: frequent and abundant in clear lakes. Maximum cell abundance in turbid and clear lakes. Values in red with an asterisk denote abundances exceeding World Health Organization (WHO) Alert level 2 for drinking water and Guide level 2 for recreation (1.E+05 cells/mL).

**Material Supplementario 4.** Lista de cianobacterias registradas en las lagunas pampeanas clasificadas de acuerdo a su ocurrencia. t: presentes en lagunas turbias; tt: frecuentes y abundantes en lagunas turbias; c: presentes en lagunas claras; cc: frecuentes y abundantes en lagunas claras. Valores máximos de abundancia de células en lagunas turbias y claras. Los valores en rojo con asterisco indican abundancias que exceden los valores de nivel de Alerta 2 para agua de bebida y nivel Guía 2 para recreación. de acuerdo con la Organización Mundial de la Salud (1.E+05 células/mL).

	Ocurrence	Maximum in clear lakes (cells/mL)	Maximum in turbid lakes (cells/mL)
<i>Anabaenopsis arnoldii</i>	t c	2.E+03	1.E+03
